## No C19 Symptoms

**Telephone / Video Consult** Most cases managed online, by phone or by video.

F2F needed?

### Principles

Restrict building access eg. by entryphone

Patient comes to surgery alone, wearing mask. Social distancing whilst waiting. Clinician to wear Adequate PPE for every single F2F appointment.

Patient washes hands, brief consultation

#### cir admitted. Struggling to do ADLS Wipe down all surfaces afterwards worse. cli No urine output in 12 hours Clean down the waiting room and patient toilets regularly Remember to consider increased to Adults RR 20-24 Adults HR 91-130 New confusion VTE risk in any pregnant or coi Ensure the risk/benefit has been considered including a risk assessment of the (measured by Pt/over video) post-partum woman with a th person carrying out the assessment or procedure using a recognised health risk Adults RR >25 positive COVID test If patient has a monitor th Adults HR ≥131 th Adults O2 Sats 93-94% or 3-4% less than PR normal Care Home Visits Checklist https://www.tamesideandglossopccg.org/clinical If patient has a monitor use Rest, Paracetamol, Fluids РН Adults O2 Sats ≤92% or >4% less than usual CONSIDER HOSPITAL ASSESSMENT Safety Netting, Advised to call Tips to deliver good primary care Practice (or 111 OOH) if symptoms are worse. If your practice has specific reasons why care (eg. blood tests, smears) cannot be Note: patients can become delivered due to specific C-19 related risks/capacity issues then consider making unwell on day 6-8 and rapidly good use of the PCAS service or talk to your PCN CD to explore alternatives. If not yet for hospital assessment: Assess pre-COVID deteriorate. They may be suitable Home O2 monitoring RCGP/BMA Guidance on workload prioritisation **Clinical Frailty Score** for home O2 monitoring if they See separate guidance Preventative/LTC Care fall into a high risk category for serious disease. See LINK for CCG Guidance Caring for vulnerable groups (LCS Bundle): CFS≥5 CFS≤4 Consider Pulmicort turbohaler 800 mcg twice daily for up to 14 days or until all SMI healthchecks: See LINK for guidance on CCG expectations. doses of the inhaler are used (whichever comes first). EoLC to be Consider Secondary bacterial Tá rovided by GP/ pneumonia if there is pleuritic chest Community C Symptomatic staff: Either the same route as symptomatic patients (above) or 'Ongoing symptomatic COVID-19': Services pain or purulent sputum S practice-provided PCR test signs and symptoms of COVID-19: 4-12 **REMEMBER** -all non-COVID acute medical Doxycycline 200mg stat, 100mg od 5/7

Asymptomatic patient-facing practice staff: Practice-provided lateral flow test (LFT) twice a week and report to https://www.gov.uk/report-covid19-results

Asymptomatic members of the public:

# **C19 Symptoms** — Cough or fever

(Pts may have myalgia, fatigue, anosmia, sore throat, diarrhoea, congestion or delirium/unexplained deterioration/falls in older people)

## **Triage Assessment: Phone/Video** This will be done in the first instance by 111/CCAS. However if patients phone to C19 more likely (bi their GP surgery then they should be dealt with by the practice and not Us redirected to 111. CCAS may book directly into GP system via GP Connect. syr py C19 is the *most likely* cause of symptoms Eng Mild Re Moderate Severe ma as New SOB, Mild chest tightness Check if pt already has a care Stay at home, self-care advice, In Completing full sentences plan stating they prefer not to be contact NHS 111 if symptoms get dmissions also go via Digital health as OR Amoxicillin 500mg tds 5/7 before 0161 922 4460.

Patients with COVID pneumonia have

an increased risk of VTE, esp in the

post-partum period. Consider

admission if concerned.

#### **Tameside & Glossop CCG/LMC** GP Guidance 11/06/2021 Ve 26

Consider double triage with colleague.

Person triaging sees the patient.
